

RotaSec

Manual Security Turnstile for External Installation

RotaSec is a robust trouble-free full height turnstile available in many configurations: from the basic painted (model B), further enhanced by a full side frame (model F) and also the roof with canopy, flush mounted down lights and rainwater downpipe (model R), up to model S including plain lateral sides and passage direction red-green status lights.

Delivered in a kit form, it is easily transported to the installation site. Available in single, double and double interlocking layout configurations for sites where space is an issue.

Available with three (120°) rotor elements for more passage clearance or four (90°) rotor elements for increased security.

Passage in both directions electronically controlled.

RotaSec offers a standard electromechanical head able to prevent two passages at one time and also one head further equipped with damper for a silent mechanism and smooth operation.

In the event of an emergency or power-off scenario, the unit can be configured fail-safe i.e. rotor freely rotates or fail-lock i.e. rotor locks. This option is available either in one or both directions of passage.

Technical Specifications

Drive

Hand operated
Logic Voltage 24Vac

Materials

Casework: Galvanised steel, painted (textured polyester powder top coat, Gunnebo standard colours)
Mechanism Cover: GRP (Glass reinforced plastic)
Canopy: GRP (Glass reinforced plastic)
Side Cabinet: GRP (Glass reinforced plastic)
Rotor Assembly: Tubular mild steel, hot zinc sprayed and painted (textured polyester powder top coat, white RAL

9010)

Gunnebo standard colours: black RAL 9005, white RAL 9010, grey RAL 7004, green RAL 6005. GRP parts are also available in the same colour range

Mechanism

Electro-mechanical head mechanism:

- Positive action lock to prevent two passages at one time
- Self centering mechanism to ensure complete rotation in the rest position
- Anti backup device to prevent reverse rotation once the head moved 30° from rest position
- Hydraulic damper to ensure a smooth and quiet operation (optional)

Power Failure / Fire Alarm

The rotor wings remain locked in the fail-lock configuration or can freely rotate in the fail-safe configuration. Fail-Lock or Fail-Safe configuration is available in one or both directions and must be specified at time of order placement. Note that head mechanism fail state will be the same as power failure choice. Input facility available for voltage-free contact to effect fire alarm fail state (COM1 interface required)

Interface

The control logic provides potential-free contacts to either push button or card reader input. Card reader inhibit and reset output signals are available as standard. Adjustable time out: i.e. Go signal is cancelled if passage is not completed within a preset time i.e. 5-30sec

Power Supply / Power Rating

230Vac 50Hz or 115Vac 60Hz
Power Rating 50VA. 50 + 50VA for Double unit
Additional 40VA with lights, per unit

Operating Temperature / IP Rating / MCBF / MTTR

0 to +55°C (RH 95% not condensing) / IP34 / 1.5M cycles / less than 30min

Flow Rates (approximate)

Insertion Type Reader, 12 passages per minute
Swipe Type Reader, 15 passages per minute
Proximity Reader "Hands Free", 17 passages per minute

Models or Versions

- RotaSec B90S (Single)
- RotaSec B120S
- RotaSec F90S
- RotaSec F120S
- RotaSec R90S
- RotaSec R120S
- RotaSec S90S
- RotaSec S120S

Above Single layouts also available as:

- Double (D)
- Double Interlocking (DI) (except RotaSec B)

Options

- Card reader integration
- Damping mechanism
- Push button console
- Remote console
- Internal lighting
- Status lights (Red-Green)
- Trombone rotor
- Other RAL colour
- Stainless steel rotor bars with black painted column

Applications

- Government
- Retail
- Finance
- Telecommunications
- Information
- Technology
- Banking
- Publishing
- Leisure
- Petrochemicals
- Education

Important

- Any horizontal pipe or conduit runs below the RotaSec Turnstile must be at least 140mm below FFL
- Cables metal conduit, shall come up at least 50mm from foundation
- It is the customer's responsibility to ensure the structural integrity and strength of the installation location
- The dimensions reported on this Product Data Sheet are for information only. In order to prepare the Installation Site, please refer to your usual Gunnebo Customer Service contact
