you have the best
protection for your
valuables.

Platinum Safe Range

BURGLARY - RESISTANT PROTECTION

Key Features

- The traditional construction promotes its strength complemented by a clean and simple design.
- All Platinum safes are tested and certified by leading test authorities.
- Passive and active relockers are incorporated into the boltwork to resist attack.
- The cash rating increases with the grade of safe.
- The Platinum range can be customised with a choice of locking options, deposit traps, shelves and lockable drawer in order to meet customer requirements.
- Our research into barrier materials has provided an advanced range specially selected for the Platinum. The characteristics of the Borox™SP barrier material strengthens the resistance to cutting, coupled with special construction techniques, provide unmatched resistance to attack in each category.
- As an extension of the range deposit versions are included. The deposit head is a fully integrated drawer unit in the safe and equipped with anti-fishing plate.
- Base fixing is standard on all models.

Chubb safes Drop Safes - Offer your business the ultimate in security and protection

Cash takings are "dropped" into the safe via a secure deposit trap. Keys to the safe are not held on your premises, which means a reduction in the risk of crime. The versatile range of deposit traps are manufactured for use as either front flush or rear entry through the wall (230mm maximum). The patented G-trap is keyless but still maintains a high security level. The design and materials used in each trap are equivalent in strength to the SABs rating given to the safe to which it is attached, meaning that the trap does not weaken the overall strength of the safe or reduce its resistance to attack.

A5 Type Drawer Deposit

- Drop size (in mm): 160 x 154 x 70
- Locking: One key lock

F Type Drawer Deposit

- Drop size (in mm): 210 x 300 x 100
- Locking: One key lock

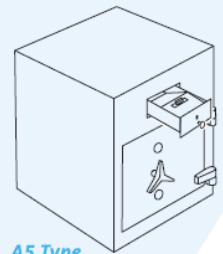

F Type Rear Drawer Deposit

- Drop size (in mm): 210 x 300 x 100
- Locking: One key lock
- Wall thickness: 230mm maximum

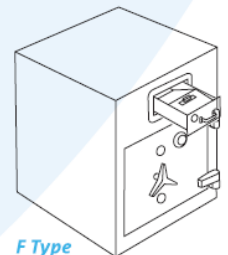

G Type Drawer Deposit

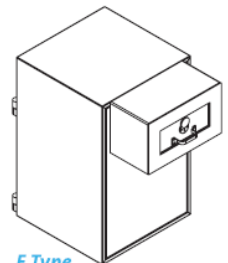

- Drop size (in mm): 210 x 300 x 100 (via top of safe)
- Locking: The unique design of this drawer deposit allows the trap to be keyless but still maintain security levels.

Locking

- Standard locking is dependant on the category of the safe, either a key lock or a combination of a key lock and keyless combination lock. A wide variety of electronic, time and time-delay locks can be fitted on request.

The electronic lock provides intelligent locking for your security and access control requirements.

Many customers require sophisticated locking systems in order to be accountable for access to money, data or private documents.

Electronic lock features:

- Basic to more sophisticated locking options
- 1 master code opening
- 2 - 7 user codes
- Time delay of 1-99 minutes for master codes and user access locks
- Dependant on level required
 - Dual custody codes
 - CIT code
 - Duress
- Audit trail - 500 events with times
- Finger print reader

Key lock

Combination lock with CS 'spy' shield to prevent unauthorised viewing of access code
