

Titanium Cat 5 Safe

Titanium Cat 5 Safes offer comprehensive security solutions for businesses that deal with cash takings. The safe is manufactured to the highest standards and SABS approved. The design, latest methods of manufacturing and modern barrier materials give it a considerable degree of resistance to modern burglary attack. The Titanium Cat 5 has additional reinforcement and includes two key locks with a three wheel combination lock, increasing the value of cash rating.

Key Features

- The traditional construction promotes its strength complemented by a clean and simple design
- All Titanium safes are tested and certified by leading test authorities
- Active re-lockers are incorporated into the bolt-work to resist attack
- The Titanium range can be customised with a choice of locking options, deposit traps, shelves and lockable drawer in order to meet customer requirements
- Base fixing is standard on all models
- Our research into barrier materials has provided an advance range specially selected for the Titanium
- The characteristics of the BoroxTMSP barrier material strengthens the resistance to cutting, coupled with special construction techniques, provide unmatched resistance to attack in each category
- As an extension of the range deposit versions are included. The deposit head is a fully integrated drawer unit in the safe and equipped with an anti-fishing plate

Size 9	638L	2	1	1940	890	675	1800	750	470	3	2 x ½ (w)	1340Kg		

Cash Ratings

Cash Rating is “The amount an insurance company will cover in a safe/cabinet overnight.” The actual amount of cover can vary between insurance companies and locations and may be different to the manufacturer’s recommended rating. If this is important to you, you should check what cover your insurance company will offer. Chubb safes offer a range of cash rated safes of between R5 000 for SANS 751 Category 1 and R300 000 for SANS 751 Category 5 safes.

Lock Options

Our comprehensive lock range includes the latest industry locks which offer a wide range of features. So whether it be the “mechanical combination” lock or a more hi-tech electronic solution, Chubb safes are sure to have a lock which will meet your security needs. We have explained the key terms associated with locks below.

Definitions :

- **Key Lock:** A manual key operated lock.
- **Mechanical Combination:** A mechanical keyless dial lock with a changeable combination.
- **Electronic Lock:** An electronically operated keypad lock with a changeable combination.
- **Manager Mode:** Allows one user to control the functions of other combination holders.
- **Number of Users:** The number of users able to program in their own access code.
- **Duress Feature:** It is possible for an alarm engineer to link the lock into a monitored alarm system. It is then possible, by a given procedure, to operate the lock, open the safe and silently signal to the monitoring station that this is being done under duress.
- **Time Delay:** This feature allows for a pre-set delay between operating the lock and being able to open the safe. The operation may vary between lock types.
- **Time Lock:** Time lock allows the user to set periods during which the lock may be operated, e.g. during business hours only. The options available will vary between locks.
- **Audit Trail:** The lock is able to give a report (it will vary in detail from model to model) of usage and may show times of operation, codes used and operations performed.
- **Dual Control:** Allows two users to enter their details before any operation can be performed.

Planning, Delivery & Installation

Once you have selected a safe or cabinet, Gunnebo can offer you a comprehensive installation survey (for certain products only). Gunnebo will then agree with you a flexible installation schedule. The flexibility of the installation process is evidence of Gunnebo’s commitment towards ensuring the cost and time efficient completion of your purchase.

Gunnebo products are delivered and installed by trained Gunnebo installers. Whatever the delivery environment (e.g. large bank or small office), you can be assured that the installers will take the greatest care. We are also focused on making sure the service on offer is achievable, to the highest standards of workmanship and is promptly completed within the contracted timescales.
